COMPARISON AND PROFILES

Model Comparison: residuals - Concentration

Name Alkaline Coal fly ash NL

Legend

- Total Average Deviation** Square root of the sum of the squared values of residuals divided by the number of values, over the entire X range.
 - User Average Deviation** Square root of the sum of the squared values of residuals divided by the number of values, over the user defined X range.
 - Fractional Average Deviation** Square root of the sum of the squared values of residuals divided by the number of values, over the fraction.
- Note that the Total and User Average Deviation columns are averages as well.
