## RED MUD AU

## COMPARISON AND PARTITIONING

## Model Comparison: residuals - Concentration

Name Red Mud

Y Values Interpolation

Type Logarithmic

Legend

**Total Average Deviation** Square root of the sum of the squared values of residuals divided by the number of values, over the entire X range.

**User Average Deviation** Square root of the sum of the squared values of residuals divided by the number of values, over the user defined X range.

**Fractional Average Devi** Square root of the sum of the squared values of residuals divided by the number of values, over the fraction.

Note that the Total and User Average Deviation columns are averages as well.

### Residual details, concentrations

Residuals as log(model/sample)
