ALKALI ACTIVATED CEMENT

COMPARISON AND PARTITIONING

ALKALI ACTIVATED CEMENT

COMPARISON AND PARTITIONING

Model Comparison: residuals - Concentration

Name Alkali activated cement

Legend

Total Average Deviation Square root of the sum of the squared values of residuals divided by the number of values, over the entire X range.

User Average Deviation Square root of the sum of the squared values of residuals divided by the number of values, over the user defined X range.

Fractional Average Deviation Square root of the sum of the squared values of residuals divided by the number of values, over the fraction.

Note that the Total and User Average Deviation columns are averages as well.
